## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to a method for analyzing and generating an optimized circuit, classified in class 716, subclass 2.
  - II. Claims 7-22, drawn to a communications interface between two devices, classified in class 710, subclass 53.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as providing the ability to analyze a circuit implemented in programmable logic for possible optimizations, while invention II has separate utility such as disclosing specifics of how a communications interface utilizes channels, multiplexers, demultiplexers and buffers to carry and store data. See MPEP § 806.05(d).
